

Airgas Demo Day

February 29th, 2012

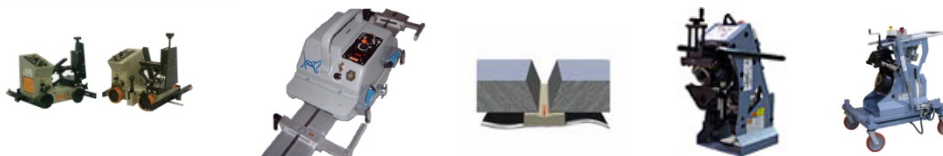

Miller Electric & Gullco International

Dear Valued Airgas Customers:

Airgas would like to invite you to a Demo Day at the AIDT Maritime Training Facility in Mobile, Alabama on February 29th. We will feature new and innovative products manufactured by Miller Electric and Gullco International. The products and descriptions that will be at the event are below. There will be a wide variety of products, and they can be used in various heavy metal fabrication applications. Airgas is your source for technical and advanced welding solutions, and this is one of the ways we bring new technology to market. Please let us know if you are interested in a particular product. Also, please contact us if you already have a specific application in mind. If you cannot make this event we can schedule a demonstration at your facility either the day before or after, or one day in the future. We will also have door prizes ranging from welding helmets, gloves, glasses, t-shirts, hats and more.

Airgas would like to provide lunch to all who are attending. Please contact Michael Zoghby via cell (251)583-9373 or e-mail michael.zoghby@airgas.com to RSVP. I welcome your attendance, and want to make sure we have a good plan to ensure a pleasurable experience.

Thank you for allowing Airgas the opportunity to serve your team. We look forward to seeing you there.

MOGGY, KAT, Various Types of Ceramic Tape, Beveling Machines
